So is Greece, and for this you can blame the euro-zone. Greece's bank bailouts and European Central Bank bailouts seem to be an exercise in monetary discipline. It is unclear if Europe will have another banking crisis on its hands. The Greek government is trying to push forward with a bill that will raise the retirement age to 65 from 62, but the Greek government and the European Commission don't seem to have any appetite for raising the retirement age to 67, as the European Commission does.. A new report by The New York Times lays out the story of how the European Commission and European Central Bank got involved in

the Greek debt restructuring effort with the explicit goal of stimulating economic growth and employment. The IMF, the World Bank, the European Union and the European Economic and Monetary Agency (EEMA) coordinated the effort during which the Greek government agreed to let creditors off the hook. When the banks refused to loosen credit, it was the European Union, which had just agreed to provide Greece with two billion euros of emergency liquidity from Eurobonds, that put pressure on the new government to accept bond swaps.. 5. Reinstate European growth through a stronger private sector; a major step in the growth path that is being made by a recovery in China and Japan..
